TECHNOLOGY STACK DIRECTORY

210 technologies across 21 categories

Official websites and documentation links · November 2026

A category-wise technology reference for students, developers, architects and IT professionals.

How to use: Browse the categories and use the clickable official website and documentation links. Verify lifecycle, licensing, support and version compatibility before adopting a technology.

Catalogue contents

• Operating Systems (12 technologies)
• Programming Languages (18 technologies)
• Databases & Data Stores (16 technologies)
• Mainframe & Enterprise Systems (14 technologies)
• Web & Front-end Technologies (14 technologies)
• Backend Frameworks & APIs (15 technologies)
• Cloud Platforms (8 technologies)
• Containers & Orchestration (7 technologies)
• DevOps, CI/CD & Infrastructure as Code (14 technologies)
• Application Servers & Middleware (9 technologies)
• Messaging, Streaming & Integration (7 technologies)
• AI, Machine Learning & Data Science (12 technologies)
• Mobile & Desktop Development (8 technologies)
• Networking & Communication (8 technologies)
• Security & Identity (8 technologies)
• Testing & Quality Engineering (9 technologies)
• IDEs, Editors & Developer Tools (9 technologies)
• Business Applications & Enterprise Platforms (5 technologies)
• Monitoring, Logging & Observability (6 technologies)
• Business Intelligence & Analytics (5 technologies)
• Embedded, IoT & Hardware Platforms (6 technologies)

Operating Systems

Desktop, server, Unix-like and enterprise operating systems.

Windows

Microsoft operating system for desktops and servers.

Website: https://www.microsoft.com/windows
Documentation: https://learn.microsoft.com/windows/

Windows Server

Microsoft server operating system.

Website: https://www.microsoft.com/windows-server
Documentation: https://learn.microsoft.com/windows-server/

Linux

Open-source kernel used by many Linux distributions.

Website: https://www.kernel.org/
Documentation: https://docs.kernel.org/

Ubuntu

Popular Linux distribution for desktop, server and cloud.

Website: https://ubuntu.com/
Documentation: https://help.ubuntu.com/

Red Hat Enterprise Linux

Enterprise Linux distribution from Red Hat.

Website: https://www.redhat.com/en/technologies/linux-platforms/enterprise-linux
Documentation: https://docs.redhat.com/

Debian

Community-developed Linux distribution.

Website: https://www.debian.org/
Documentation: https://www.debian.org/doc/

Fedora

Community Linux distribution sponsored by Red Hat.

Website: https://fedoraproject.org/
Documentation: https://docs.fedoraproject.org/

SUSE Linux Enterprise

Enterprise Linux platform from SUSE.

Website: https://www.suse.com/products/server/
Documentation: https://documentation.suse.com/

Oracle Linux

Enterprise Linux distribution from Oracle.

Website: https://www.oracle.com/linux/
Documentation: https://docs.oracle.com/en/operating-systems/oracle-linux/

macOS

Apple desktop operating system.

Website: https://www.apple.com/macos/
Documentation: https://developer.apple.com/documentation/

FreeBSD

Open-source Unix-like operating system.

Website: https://www.freebsd.org/
Documentation: https://docs.freebsd.org/

IBM AIX

IBM enterprise Unix operating system.

Website: https://www.ibm.com/products/aix
Documentation: https://www.ibm.com/docs/en/aix

■■ Programming Languages

General-purpose, enterprise, scripting and systems languages.

Java

Object-oriented language and platform for enterprise applications.

Website: https://www.oracle.com/java/
Documentation: https://docs.oracle.com/en/java/

Python

General-purpose language widely used in automation, data and AI.

Website: https://www.python.org/
Documentation: https://docs.python.org/3/

JavaScript

Core language of the web browser ecosystem.

Website: https://developer.mozilla.org/en-US/docs/Web/JavaScript
Documentation: https://developer.mozilla.org/en-US/docs/Web/JavaScript

TypeScript

Typed superset of JavaScript.

Website: https://www.typescriptlang.org/
Documentation: https://www.typescriptlang.org/docs/

C

General-purpose systems programming language.

Website: https://www.open-std.org/jtc1/sc22/wg14/
Documentation: https://en.cppreference.com/w/c

C++

High-performance systems and application programming language.

Website: https://isocpp.org/
Documentation: https://en.cppreference.com/w/

C#

Modern language for .NET applications.

Website: https://learn.microsoft.com/dotnet/csharp/
Documentation: https://learn.microsoft.com/dotnet/csharp/

Go

Compiled language designed at Google.

Website: https://go.dev/
Documentation: https://go.dev/doc/

Rust

Memory-safe systems programming language.

Website: https://www.rust-lang.org/
Documentation: https://doc.rust-lang.org/

PHP

Server-side scripting language for web development.

Website: https://www.php.net/
Documentation: https://www.php.net/docs.php

Ruby

Dynamic language focused on developer productivity.

Website: https://www.ruby-lang.org/
Documentation: https://www.ruby-lang.org/en/documentation/

Kotlin

Modern language for JVM, Android and multiplatform development.

Website: https://kotlinlang.org/
Documentation: https://kotlinlang.org/docs/home.html

Swift

Programming language for Apple platforms.

Website: https://www.swift.org/
Documentation: https://www.swift.org/documentation/

R

Language and environment for statistical computing.

Website: https://www.r-project.org/
Documentation: https://cran.r-project.org/manuals.html

Scala

JVM language combining object-oriented and functional programming.

Website: https://www.scala-lang.org/
Documentation: https://docs.scala-lang.org/

Perl

General-purpose scripting language.

Website: https://www.perl.org/
Documentation: https://perldoc.perl.org/

Dart

Language used by Flutter and other applications.

Website: https://dart.dev/
Documentation: https://dart.dev/guides

COBOL

Business data processing language used in enterprise systems.

Website: https://www.ibm.com/products/cobol
Documentation: https://www.ibm.com/docs/en/cobol-zos

■■ Databases & Data Stores

Relational, NoSQL, in-memory, search and time-series data platforms.

Oracle Database

Enterprise relational database management system.

Website: https://www.oracle.com/database/
Documentation: https://docs.oracle.com/en/database/

Microsoft SQL Server

Microsoft relational database platform.

Website: https://www.microsoft.com/sql-server
Documentation: https://learn.microsoft.com/sql/

PostgreSQL

Open-source object-relational database.

Website: https://www.postgresql.org/
Documentation: https://www.postgresql.org/docs/

MySQL

Popular open-source relational database.

Website: https://www.mysql.com/
Documentation: https://dev.mysql.com/doc/

MariaDB

Open-source relational database forked from MySQL.

Website: https://mariadb.org/
Documentation: https://mariadb.com/kb/en/documentation/

MongoDB

Document-oriented NoSQL database.

Website: https://www.mongodb.com/
Documentation: https://www.mongodb.com/docs/

Redis

In-memory data store and cache.

Website: https://redis.io/
Documentation: https://redis.io/docs/latest/

Cassandra

Distributed wide-column NoSQL database.

Website: https://cassandra.apache.org/
Documentation: https://cassandra.apache.org/doc/latest/

IBM Db2

IBM enterprise relational database family.

Website: https://www.ibm.com/products/db2
Documentation: https://www.ibm.com/docs/en/db2

SQLite

Embedded relational database engine.

Website: https://sqlite.org/
Documentation: https://sqlite.org/docs.html

Amazon DynamoDB

Managed NoSQL database service.

Website: https://aws.amazon.com/dynamodb/
Documentation: https://docs.aws.amazon.com/dynamodb/

Elasticsearch

Distributed search and analytics engine.

Website: https://www.elastic.co/elasticsearch
Documentation: https://www.elastic.co/guide/index.html

Neo4j

Graph database platform.

Website: https://neo4j.com/
Documentation: https://neo4j.com/docs/

Snowflake

Cloud data platform and data warehouse.

Website: https://www.snowflake.com/
Documentation: https://docs.snowflake.com/

ClickHouse

Column-oriented analytical database.

Website: https://clickhouse.com/
Documentation: https://clickhouse.com/docs

InfluxDB

Time-series database platform.

Website: https://www.influxdata.com/
Documentation: https://docs.influxdata.com/

■ Mainframe & Enterprise Systems

Mainframe operating systems, transaction processing, databases and development tools.

IBM z/OS

Mainframe operating system.

Website: https://www.ibm.com/products/zos
Documentation: https://www.ibm.com/docs/en/zos

IBM z/VM

Mainframe virtualization operating system.

Website: https://www.ibm.com/products/zvm
Documentation: https://www.ibm.com/docs/en/zvm

IBM z/TPF

High-volume transaction processing operating system.

Website: https://www.ibm.com/products/ztpf
Documentation: https://www.ibm.com/docs/en/ztpf

IBM CICS

Transaction processing and application server system.

Website: https://www.ibm.com/products/cics
Documentation: https://www.ibm.com/docs/en/cics-ts

IBM IMS

Hierarchical database and transaction manager.

Website: https://www.ibm.com/products/ims
Documentation: https://www.ibm.com/docs/en/ims

IBM Db2 for z/OS

Enterprise relational database for IBM Z.

Website: https://www.ibm.com/products/db2
Documentation: https://www.ibm.com/docs/en/db2-for-zos

IBM VSAM

Virtual Storage Access Method data management.

Website: https://www.ibm.com/docs/en/zos/3.1.0?topic=access-methods-vsam

IBM Enterprise COBOL

COBOL compiler for IBM Z.

Website: https://www.ibm.com/products/cobol-compiler-zos
Documentation: https://www.ibm.com/docs/en/cobol-zos

IBM Enterprise PL/I

PL/I compiler for IBM Z.

Website: https://www.ibm.com/products/pli-compiler-zos
Documentation: https://www.ibm.com/docs/en/pli-for-zos

JCL

Job Control Language for z/OS batch processing.

Website: https://www.ibm.com/docs/en/zos/3.1.0?topic= JES-job-control-language

IBM RACF

Resource access control and security for z/OS.

Website: https://www.ibm.com/products/resource-access-control-facility
Documentation: https://www.ibm.com/docs/en/zos

Broadcom Endevor

Mainframe software change and configuration management.

Website: https://www.broadcom.com/products/mainframe/application-development/endevor

BMC AMI DevX

Mainframe development and DevOps toolset.

Website: https://www.bmc.com/it-solutions/ami-devx.html

Rocket Software

Mainframe modernization and enterprise software.

Website: https://www.rocketsoftware.com/

■ Web & Front-end Technologies

Standards and libraries used to build browser-based applications.

HTML

Markup language for web documents.

Website: https://html.spec.whatwg.org/
Documentation: https://developer.mozilla.org/en-US/docs/Web/HTML

CSS

Style sheet language for web presentation.

Website: https://www.w3.org/Style/CSS/
Documentation: https://developer.mozilla.org/en-US/docs/Web/CSS

Web APIs

Browser APIs and web platform capabilities.

Website: https://developer.mozilla.org/en-US/docs/Web/API

React

JavaScript library for user interfaces.

Website: https://react.dev/
Documentation: https://react.dev/learn

Angular

Web application framework maintained by Google.

Website: https://angular.dev/
Documentation: https://angular.dev/overview

Vue.js

Progressive JavaScript framework.

Website: https://vuejs.org/
Documentation: https://vuejs.org/guide/

Svelte

Compiler-based UI framework.

Website: https://svelte.dev/
Documentation: https://svelte.dev/docs

Next.js

React framework for full-stack web applications.

Website: https://nextjs.org/
Documentation: https://nextjs.org/docs

Node.js

JavaScript runtime built on V8.

Website: https://nodejs.org/
Documentation: https://nodejs.org/en/learn

Express

Minimal web framework for Node.js.

Website: https://expressjs.com/
Documentation: https://expressjs.com/en/guide/routing.html

jQuery

JavaScript library for DOM and event utilities.

Website: https://jquery.com/
Documentation: https://api.jquery.com/

Bootstrap

Responsive front-end component toolkit.

Website: https://getbootstrap.com/
Documentation: https://getbootstrap.com/docs/

Tailwind CSS

Utility-first CSS framework.

Website: https://tailwindcss.com/
Documentation: https://tailwindcss.com/docs

Vite

Front-end build tool and development server.

Website: https://vite.dev/
Documentation: https://vite.dev/guide/

■■ Backend Frameworks & APIs

Server-side frameworks, API development and application runtimes.

Spring Framework

Java application framework.

Website: https://spring.io/projects/spring-framework
Documentation: https://docs.spring.io/spring-framework/reference/

Spring Boot

Convention-based framework for standalone Spring applications.

Website: https://spring.io/projects/spring-boot
Documentation: https://docs.spring.io/spring-boot/

Jakarta EE

Enterprise Java specifications and APIs.

Website: https://jakarta.ee/
Documentation: https://jakarta.ee/specifications/

Quarkus

Kubernetes-native Java framework.

Website: https://quarkus.io/
Documentation: https://quarkus.io/guides/

Micronaut

JVM framework for modular microservices.

Website: https://micronaut.io/
Documentation: https://docs.micronaut.io/

ASP.NET Core

Cross-platform framework for .NET web apps and APIs.

Website: https://dotnet.microsoft.com/apps/aspnet
Documentation: https://learn.microsoft.com/aspnet/core/

Django

High-level Python web framework.

Website: https://www.djangoproject.com/
Documentation: https://docs.djangoproject.com/

Flask

Lightweight Python web framework.

Website: https://flask.palletsprojects.com/
Documentation: https://flask.palletsprojects.com/en/stable/

FastAPI

Python framework for APIs.

Website: https://fastapi.tiangolo.com/
Documentation: https://fastapi.tiangolo.com/

Laravel

PHP web application framework.

Website: https://laravel.com/
Documentation: https://laravel.com/docs

Ruby on Rails

Full-stack Ruby web framework.

Website: https://rubyonrails.org/
Documentation: https://guides.rubyonrails.org/

NestJS

Node.js framework for scalable server applications.

Website: https://nestjs.com/
Documentation: https://docs.nestjs.com/

GraphQL

Query language and runtime for APIs.

Website: https://graphql.org/
Documentation: https://graphql.org/learn/

OpenAPI

Specification for describing HTTP APIs.

Website: https://www.openapis.org/
Documentation: https://spec.openapis.org/oas/latest.html

gRPC

High-performance remote procedure call framework.

Website: https://grpc.io/
Documentation: https://grpc.io/docs/

■■ Cloud Platforms

Public cloud providers, cloud-native platforms and developer services.

Amazon Web Services

Cloud computing platform from Amazon.

Website: https://aws.amazon.com/
Documentation: https://docs.aws.amazon.com/

Microsoft Azure

Microsoft cloud computing platform.

Website: https://azure.microsoft.com/
Documentation: https://learn.microsoft.com/azure/

Google Cloud

Google cloud computing platform.

Website: https://cloud.google.com/
Documentation: https://docs.cloud.google.com/

Oracle Cloud Infrastructure

Oracle cloud infrastructure services.

Website: https://www.oracle.com/cloud/
Documentation: https://docs.oracle.com/en-us/iaas/

IBM Cloud

IBM cloud platform and services.

Website: https://www.ibm.com/cloud
Documentation: https://cloud.ibm.com/docs

Alibaba Cloud

Cloud services platform from Alibaba.

Website: https://www.alibabacloud.com/
Documentation: https://www.alibabacloud.com/help

DigitalOcean

Cloud platform for developers and businesses.

Website: https://www.digitalocean.com/
Documentation: https://docs.digitalocean.com/

Cloudflare

Connectivity, security, developer and edge cloud platform.

Website: https://www.cloudflare.com/
Documentation: https://developers.cloudflare.com/

■ Containers & Orchestration

Container runtimes, orchestration and packaging platforms.

Docker

Container development and runtime platform.

Website: https://www.docker.com/
Documentation: https://docs.docker.com/

Kubernetes

Container orchestration platform.

Website: https://kubernetes.io/
Documentation: https://kubernetes.io/docs/

Podman

Daemonless container engine.

Website: https://podman.io/
Documentation: https://docs.podman.io/

containerd

Industry-standard container runtime.

Website: https://containerd.io/
Documentation: https://github.com/containerd/containerd

Helm

Package manager for Kubernetes.

Website: https://helm.sh/
Documentation: https://helm.sh/docs/

OpenShift

Enterprise Kubernetes platform from Red Hat.

Website: https://www.redhat.com/en/technologies/cloud-computing/openshift
Documentation: https://docs.openshift.com/

Rancher

Kubernetes management platform.

Website: https://www.suse.com/products/rancher/
Documentation: https://ranchermanager.docs.rancher.com/

■ DevOps, CI/CD & Infrastructure as Code

Source control, automation, build, deployment and infrastructure management.

Git

Distributed version control system.

Website: https://git-scm.com/
Documentation: https://git-scm.com/doc

GitHub

Code hosting and collaboration platform.

Website: https://github.com/
Documentation: https://docs.github.com/

GitLab

DevSecOps and software delivery platform.

Website: https://about.gitlab.com/
Documentation: https://docs.gitlab.com/

Jenkins

Automation server for CI/CD.

Website: https://www.jenkins.io/
Documentation: https://www.jenkins.io/doc/

GitHub Actions

Workflow automation and CI/CD in GitHub.

Website: https://github.com/features/actions
Documentation: https://docs.github.com/actions

Azure DevOps

Microsoft developer services and CI/CD.

Website: https://azure.microsoft.com/products/devops
Documentation: https://learn.microsoft.com/azure/devops/

Terraform

Infrastructure as code tool.

Website: https://www.hashicorp.com/products/terraform
Documentation: https://developer.hashicorp.com/terraform/docs

Ansible

Automation for configuration and deployment.

Website: https://www.ansible.com/
Documentation: https://docs.ansible.com/

Maven

Build and dependency management for Java projects.

Website: https://maven.apache.org/
Documentation: https://maven.apache.org/guides/

Gradle

Build automation tool.

Website: https://gradle.org/
Documentation: https://docs.gradle.org/

Apache Ant

Java-based build tool.

Website: https://ant.apache.org/
Documentation: https://ant.apache.org/manual/

SonarQube

Code quality and security analysis platform.

Website: https://www.sonarsource.com/products/sonarqube/
Documentation: https://docs.sonarsource.com/sonarqube-server/

Argo CD

Declarative GitOps continuous delivery for Kubernetes.

Website: https://argo-cd.readthedocs.io/
Documentation: https://argo-cd.readthedocs.io/en/stable/

Puppet

Infrastructure configuration management.

Website: https://www.puppet.com/
Documentation: https://help.puppet.com/

■ Application Servers & Middleware

Java and enterprise application servers, web servers and middleware.

Apache Tomcat

Servlet and Jakarta Pages container.

Website: https://tomcat.apache.org/
Documentation: https://tomcat.apache.org/tomcat-10.1-doc/

WildFly

Open-source application server.

Website: https://www.wildfly.org/
Documentation: https://docs.wildfly.org/

Red Hat JBoss EAP

Enterprise Java application platform.

Website: https://www.redhat.com/en/technologies/jboss-middleware/application-platform
Documentation: https://docs.redhat.com/en/documentation/red_hat_jboss_enterprise_application_platform/

Oracle WebLogic Server

Enterprise Java application server.

Website: https://www.oracle.com/middleware/technologies/weblogic.html
Documentation: https://docs.oracle.com/en/middleware/

IBM WebSphere

IBM enterprise application server family.

Website: https://www.ibm.com/products/websphere-application-server
Documentation: https://www.ibm.com/docs/en/was

Eclipse Jetty

Java HTTP server and Servlet container.

Website: https://jetty.org/
Documentation: https://jetty.org/docs/

NGINX

Web server, reverse proxy and load balancer.

Website: https://nginx.org/
Documentation: https://nginx.org/en/docs/

Apache HTTP Server

Open-source HTTP server.

Website: https://httpd.apache.org/
Documentation: https://httpd.apache.org/docs/

HAProxy

Load balancer and proxy.

Website: https://www.haproxy.org/
Documentation: https://docs.haproxy.org/

■ Messaging, Streaming & Integration

Message brokers, event streaming and enterprise integration technologies.

Apache Kafka

Distributed event streaming platform.

Website: https://kafka.apache.org/
Documentation: https://kafka.apache.org/documentation/

RabbitMQ

Message broker supporting multiple messaging protocols.

Website: https://www.rabbitmq.com/
Documentation: https://www.rabbitmq.com/docs

ActiveMQ

Apache message broker project.

Website: https://activemq.apache.org/
Documentation: https://activemq.apache.org/components/classic/documentation/

IBM MQ

Enterprise messaging middleware.

Website: https://www.ibm.com/products/mq
Documentation: https://www.ibm.com/docs/en/ibm-mq

Apache Camel

Integration framework for routing and mediation.

Website: https://camel.apache.org/
Documentation: https://camel.apache.org/manual/

MuleSoft Anypoint Platform

API-led integration platform.

Website: https://www.mulesoft.com/platform/ Anypoint
Documentation: https://docs.mulesoft.com/

Red Hat Integration

Integration and connectivity products.

Website: https://www.redhat.com/en/products/integration
Documentation: https://docs.redhat.com/

■ AI, Machine Learning & Data Science

AI frameworks, model platforms and machine learning libraries.

TensorFlow

Open-source machine learning framework.

Website: https://www.tensorflow.org/
Documentation: https://www.tensorflow.org/learn

PyTorch

Machine learning framework.

Website: https://pytorch.org/
Documentation: https://pytorch.org/docs/stable/index.html

scikit-learn

Machine learning tools for Python.

Website: https://scikit-learn.org/
Documentation: https://scikit-learn.org/stable/user_guide.html

Hugging Face

Open platform for models, datasets and AI applications.

Website: https://huggingface.co/
Documentation: https://huggingface.co/docs

OpenAI API

API platform for building AI applications.

Website: https://openai.com/api/
Documentation: https://platform.openai.com/docs/

Google Gemini API

Google generative AI developer API.

Website: https://ai.google.dev/
Documentation: https://ai.google.dev/gemini-api/docs

Anthropic Claude API

API for Claude models.

Website: https://www.anthropic.com/api
Documentation: https://docs.anthropic.com/

LangChain

Framework for LLM-powered applications.

Website: https://www.langchain.com/
Documentation: https://docs.langchain.com/

LlamaIndex

Framework for context-augmented LLM applications.

Website: https://www.llamaindex.ai/
Documentation: https://docs.llamaindex.ai/

Apache Spark

Unified analytics engine for large-scale data processing.

Website: https://spark.apache.org/
Documentation: https://spark.apache.org/docs/latest/

Apache Hadoop

Framework for distributed storage and processing.

Website: https://hadoop.apache.org/
Documentation: https://hadoop.apache.org/docs/

Apache Airflow

Workflow orchestration platform.

Website: https://airflow.apache.org/
Documentation: https://airflow.apache.org/docs/

■ Mobile & Desktop Development

Native and cross-platform app development frameworks.

Android

Google mobile operating system and developer platform.

Website: https://developer.android.com/
Documentation: https://developer.android.com/docs

iOS

Apple mobile operating system and developer platform.

Website: https://developer.apple.com/ios/
Documentation: https://developer.apple.com/documentation/

Flutter

Cross-platform UI toolkit from Google.

Website: https://flutter.dev/
Documentation: https://docs.flutter.dev/

React Native

Framework for native mobile apps using React.

Website: https://reactnative.dev/
Documentation: https://reactnative.dev/docs/getting-started

.NET MAUI

Cross-platform framework for native apps.

Website: https://dotnet.microsoft.com/apps/maui
Documentation: https://learn.microsoft.com/dotnet/maui/

Ionic

Cross-platform mobile app development toolkit.

Website: https://ionicframework.com/
Documentation: https://ionicframework.com/docs

Electron

Framework for desktop apps using web technologies.

Website: https://www.electronjs.org/
Documentation: https://www.electronjs.org/docs/latest/

Tauri

Framework for smaller desktop applications.

Website: https://tauri.app/
Documentation: https://v2.tauri.app/

■ Networking & Communication

Networking platforms, standards, protocols and telecom technologies.

Cisco Networking

Enterprise networking products and learning resources.

Website: https://www.cisco.com/
Documentation: https://www.cisco.com/c/en/us/support/index.html

Wireshark

Network protocol analyzer.

Website: https://www.wireshark.org/
Documentation: https://www.wireshark.org/docs/

OpenVPN

Open-source VPN platform.

Website: https://openvpn.net/
Documentation: https://openvpn.net/community-resources/

WireGuard

Modern VPN protocol and implementation.

Website: https://www.wireguard.com/
Documentation: https://www.wireguard.com/quickstart/

SIP

Session Initiation Protocol standards (IETF).

Website: https://www.ietf.org/
Documentation: https://www.rfc-editor.org/rfc/rfc3261

WebRTC

Real-time communication APIs for browsers and apps.

Website: https://webrtc.org/
Documentation: https://webrtc.org/getting-started/overview

3GPP

Mobile telecommunications standards organization.

Website: https://www.3gpp.org/
Documentation: https://www.3gpp.org/specifications

Bluetooth

Bluetooth wireless technology standards.

Website: https://www.bluetooth.com/
Documentation: https://www.bluetooth.com/specifications/

■■ Security & Identity

Application security, identity, secrets and security testing tools.

OWASP

Open community for web application security.

Website: https://owasp.org/
Documentation: https://owasp.org/www-project-top-ten/

Keycloak

Open-source identity and access management.

Website: https://www.keycloak.org/
Documentation: https://www.keycloak.org/documentation

OAuth 2.0

Authorization framework standard.

Website: https://oauth.net/2/
Documentation: https://www.rfc-editor.org/rfc/rfc6749

OpenID Connect

Identity layer built on OAuth 2.0.

Website: https://openid.net/developers/how-connect-works/
Documentation: https://openid.net/specs/openid-connect-core-1_0.html

HashiCorp Vault

Secrets management and data protection platform.

Website: https://www.hashicorp.com/products/vault
Documentation: https://developer.hashicorp.com/vault/docs

Snyk

Developer security platform.

Website: https://snyk.io/
Documentation: https://docs.snyk.io/

Burp Suite

Web application security testing platform.

Website: https://portswigger.net/burp
Documentation: https://portswigger.net/burp/documentation

Let's Encrypt

Free automated TLS certificates.

Website: https://letsencrypt.org/
Documentation: https://letsencrypt.org/docs/

■ Testing & Quality Engineering

Unit, integration, API, browser and performance testing tools.

JUnit

Java unit testing framework.

Website: https://junit.org/
Documentation: https://junit.org/junit5/docs/current/user-guide/

TestNG

Testing framework for Java.

Website: https://testng.org/
Documentation: https://testng.org/doc/

Mockito

Mocking framework for Java tests.

Website: https://site.mockito.org/
Documentation: https://javadoc.io/doc/org.mockito/mockito-core/latest/org/mockito/Mockito.html

Selenium

Browser automation framework.

Website: https://www.selenium.dev/
Documentation: https://www.selenium.dev/documentation/

Playwright

End-to-end browser testing framework.

Website: https://playwright.dev/
Documentation: https://playwright.dev/docs/intro

Cypress

Web application testing framework.

Website: https://www.cypress.io/
Documentation: https://docs.cypress.io/

Postman

API development and testing platform.

Website: https://www.postman.com/
Documentation: https://learning.postman.com/docs/

Apache JMeter

Load and performance testing tool.

Website: https://jmeter.apache.org/
Documentation: https://jmeter.apache.org/usermanual/

Gatling

Load testing platform.

Website: https://gatling.io/
Documentation: https://docs.gatling.io/

■■ IDEs, Editors & Developer Tools

Development environments, code editors, API tools and developer utilities.

Eclipse IDE

Extensible integrated development environment.

Website: https://www.eclipse.org/ide/
Documentation: https://help.eclipse.org/

IntelliJ IDEA

IDE for JVM and other languages.

Website: https://www.jetbrains.com/idea/
Documentation: https://www.jetbrains.com/help/idea/

Visual Studio Code

Source-code editor from Microsoft.

Website: https://code.visualstudio.com/
Documentation: https://code.visualstudio.com/docs

Visual Studio

Microsoft integrated development environment.

Website: https://visualstudio.microsoft.com/
Documentation: https://learn.microsoft.com/visualstudio/

NetBeans

Open-source IDE.

Website: https://netbeans.apache.org/
Documentation: https://netbeans.apache.org/tutorial/main/

Postman

API client and collaboration platform.

Website: https://www.postman.com/
Documentation: https://learning.postman.com/docs/

Swagger

Tools for OpenAPI-based API design.

Website: https://swagger.io/
Documentation: https://swagger.io/docs/

DBeaver

Universal database tool.

Website: https://dbeaver.io/
Documentation: https://dbeaver.com/docs/

Redis Insight

GUI for Redis data and operations.

Website: https://redis.io/insight/
Documentation: https://redis.io/docs/latest/operate/redisinsight/

■ Business Applications & Enterprise Platforms

ERP, CRM, enterprise workflow and business application platforms.

SAP S/4HANA

Enterprise resource planning suite.

Website: https://www.sap.com/products/erp/s4hana.html
Documentation: https://help.sap.com/docs/SAP_S4HANA_ON-PREMISE

Salesforce

Cloud CRM and business application platform.

Website: https://www.salesforce.com/
Documentation: https://developer.salesforce.com/docs

ServiceNow

Enterprise workflow and service management platform.

Website: https://www.servicenow.com/
Documentation: https://www.servicenow.com/docs/

Microsoft Dynamics 365

Enterprise CRM and ERP applications.

Website: https://www.microsoft.com/dynamics-365
Documentation: https://learn.microsoft.com/dynamics365/

Workday

Enterprise finance and human capital management.

Website: https://www.workday.com/
Documentation: https://developer.workday.com/

■ Monitoring, Logging & Observability

Metrics, logs, tracing, dashboards and operational visibility.

Prometheus

Open-source monitoring and alerting toolkit.

Website: https://prometheus.io/
Documentation: https://prometheus.io/docs/

Grafana

Observability dashboards and visualization.

Website: https://grafana.com/
Documentation: https://grafana.com/docs/

OpenTelemetry

Vendor-neutral observability framework.

Website: https://opentelemetry.io/
Documentation: https://opentelemetry.io/docs/

Elastic Stack

Search, logging and analytics stack.

Website: https://www.elastic.co/elastic-stack
Documentation: https://www.elastic.co/guide/index.html

Splunk

Data platform for observability and security.

Website: https://www.splunk.com/
Documentation: https://docs.splunk.com/

Datadog

Cloud monitoring and observability platform.

Website: https://www.datadoghq.com/
Documentation: https://docs.datadoghq.com/

■ Business Intelligence & Analytics

Reporting, dashboards, analytics and data visualization tools.

Microsoft Power BI

Business intelligence and analytics platform.

Website: https://powerbi.microsoft.com/
Documentation: https://learn.microsoft.com/power-bi/

Tableau

Data visualization and analytics platform.

Website: https://www.tableau.com/
Documentation: https://help.tableau.com/

Looker

Google Cloud business intelligence platform.

Website: https://cloud.google.com/looker
Documentation: https://cloud.google.com/looker/docs

Apache Superset

Open-source data exploration and visualization.

Website: https://superset.apache.org/
Documentation: https://superset.apache.org/docs/

Metabase

Open-source business intelligence tool.

Website: https://www.metabase.com/
Documentation: https://www.metabase.com/docs/

■ Embedded, IoT & Hardware Platforms

Microcontrollers, embedded development and connected-device platforms.

Arduino

Open-source electronics platform.

Website: https://www.arduino.cc/
Documentation: https://docs.arduino.cc/

Raspberry Pi

Single-board computers and embedded platform.

Website: https://www.raspberrypi.com/
Documentation: https://www.raspberrypi.com/documentation/

ESP32

Wi-Fi and Bluetooth microcontroller platform by Espressif.

Website: https://www.espressif.com/en/products/socs/esp32
Documentation: https://docs.espressif.com/

Zephyr RTOS

Open-source real-time operating system for embedded devices.

Website: https://www.zephyrproject.org/
Documentation: https://docs.zephyrproject.org/

FreeRTOS

Real-time operating system for microcontrollers.

Website: https://www.freertos.org/
Documentation: https://docs.freertos.org/

PlatformIO

Embedded development ecosystem.

Website: https://platformio.org/
Documentation: https://docs.platformio.org/
